DISCRETE MATHEMATICS

Editor-in-Chief Peter L. Hammer, Piscataway (NJ)

Advisory Editors
C. Berge, Paris
A.J. Hoffman, Yorktown Heights (NY)
V.L. Klee, Seattle (WA)
R.C. Mullin, Waterloo
G.-C. Rota, Cambridge (MA)
V.T. Sós, Budapest
J.H. van Lint, Eindhoven

Board of Editors
M.S. Aigner, Berlin
B. Alspach, Burnaby
G.E. Andrews, Univ. Park (PA)
A. Barlotti, Firenze
C. Benzaken, Grenoble
J.-C. Bermond, Sophia-Antipolis
N.L. Biggs, London
B. Bollobás, Memphis (TN)
R.A. Brualdi, Madison (WI)
T.H. Brylawski, Chapel Hill (NC)
P.J. Cameron, London
P. Camion, Le Chesnay
G. Chartrand, Kalamazoo (MI)
V. Chvátal, Piscataway (NJ)
D. Foata, Strasbourg
A.S. Fraenkel, Rehovot
P. Frankl, Tokyo
A.M. Frieze, Pittsburgh (PA)
I.M. Gessel, Waltham (MA)
R.L. Graham, Florham Park (NJ)
A. Hajnal, Budapest
F. Harary, Las Cruces (NM)
D.M. Jackson, Waterloo
J. Kahn, Piscataway (NJ)
G.O.H. Katona, Budapest
D.J. Kleitman, Cambridge (MA)
A.V. Kostochka, Novosibirsk
L. Lovász, New Haven (CT)
I. Rival, Ottawa
A. Rosa, Hamilton
S. Rudeanu, Bucharest
H. Sachs, Ilmenau
J. Schonheim, Tel-Aviv
N.J.A. Sloane, Florham Park (NJ)
C. Thomassen, Lyngby
W.T. Tutte, Newmarket
D.J.A. Welsh, Oxford
D.B. West, Urbana (IL)
R. Wille, Darmstadt
D.R. Woodall, Nottingham
H.P. Yap, Singapore

Editorial Manager Nelly Segal **Issue Manager** Mick van Gijlswijk

Publication Information. Discrete Mathematics (ISSN 0012-365X). For 1999 volumes 194–209 are scheduled for publication. A combined subscription to Discrete Mathematics and Discrete Applied Mathematics (Vols. 89–97) at reduced rate is available. Subscription prices are available upon request from the Publisher. Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by surface mail except to the following countries where air delivery via SAL is ensured: Argentina, Australia, Brazil, Canada, Hong Kong, India, Israel, Japan, Malaysia, Mexico, New Zealand, Pakistan, China, Singapore, South Africa, South Korea, Taiwan, Thailand, USA. For all other countries airmail rates are available upon request. Claims for missing issues must be made within six months of our publication (mailing) date. For orders, claims, product enquiries (no manuscript enquiries) please contact the Customer Support Department at the Regional Sales Office nearest to you:

New York, Elsevier Science, P.O. Box 945, New York, NY 10159-0945, USA. Tel: (+1) 212-633-3730, [Toll Free number for North American Customers: 1-888-4ES-INFO (437-4636)], Fax: (+1) 212-633-3680, E-mail: usinfo-f@elsevier.com

Amsterdam, Elsevier Science, P.O. Box 211, 1000 AE Amsterdam, Netherlands, Tel: (+ 31) 20-485-3757, Fax: (+ 31) 20-485-3432, E-mail: nlinfo-f@elsevier.nl

Tokyo, Elsevier Science, 9–15 Higashi-Azabu 1-chome, Minato-ku, Tokyo 106-0044, Japan. Tel: (+ 81) 3-5561-5033, Fax: (+ 81) 3-5561-5047, E-mail: info@elsevier.co.jp

Singapore, Elsevier Science, No. 1 Temasek Avenue, # 17-01 Millenia Tower, Singapore 039192. Tel: (+ 65) 434-3727, Fax: (+ 65) 337-2230, E-mail: asiainfo@elsevier.com.sg

ELSEVIER, Amsterdam–Lausanne–New York–Oxford–Shannon–Tokyo

Abstracted/Indexed in: ACM Computing Reviews, Cambridge Scientific Abstracts, Current Contents: Physical, Chemical & Earth Sciences, International Abstracts in Operations Research, Mathematical Reviews, PASCAL, Science Citation Index, Zentralblatt für Mathematik.

© 1999, Elsevier Science B.V. All rights reserved

This journal and the individual contributions contained in it are protected under copyright by Elsevier Science B.V., and the following terms and conditions apply to their use:

Photocopying

Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission of the publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

Permissions may be sought directly from Elsevier Science Rights & Permissions Department, PO Box 800, Oxford OX5 1DX, UK; phone: (+44) 1865 843830, fax: (+44) 1865 853333, e-mail: permissions @elsevier.co.uk. You may also contact Rights & Permissions directly through Elsevier's home page (http://www.elsevier.nl), selecting first 'Customer Support', then 'General Information', then 'Permissions Query Form'.

In the USA, users may clear permissions and make payments through the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA; phone: (978) 7508400, fax: (978) 7504744, and in the UK through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 0LP, UK; phone: (+44) 171 631 5555; fax: (+44) 171 631 5500. Other countries may have a local reprographic rights agency for payments.

Derivative Works

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the publisher is required for resale or distribution outside the institution.

Permission of the publisher is required for all other derivative works, including compilations and translations.

Electronic Storage or Usage

Permission of the publisher is required to store electronically any material contained in this journal, including any article or part of an article.

Except as outlined above, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the publisher.

Address permissions requests to: Elsevier Science Rights & Permissions Department, at the mail, fax and e-mail addresses noted above.

Notice

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of rapid advances in the medical sciences, in particular, independent verification of diagnoses and drug dosages should be made.

Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

♾ The paper used in this publication meets the requirements of ANSI/NISO Z39.48-1992 (Permanence of Paper)

List of referees: volumes 191–200

DISCRETE MATHEMATICS has continuously benefitted from the kind assistance of a great number of referees. We hereby express our gratitude for their sustained efforts, without which our activity could not have been carried out.

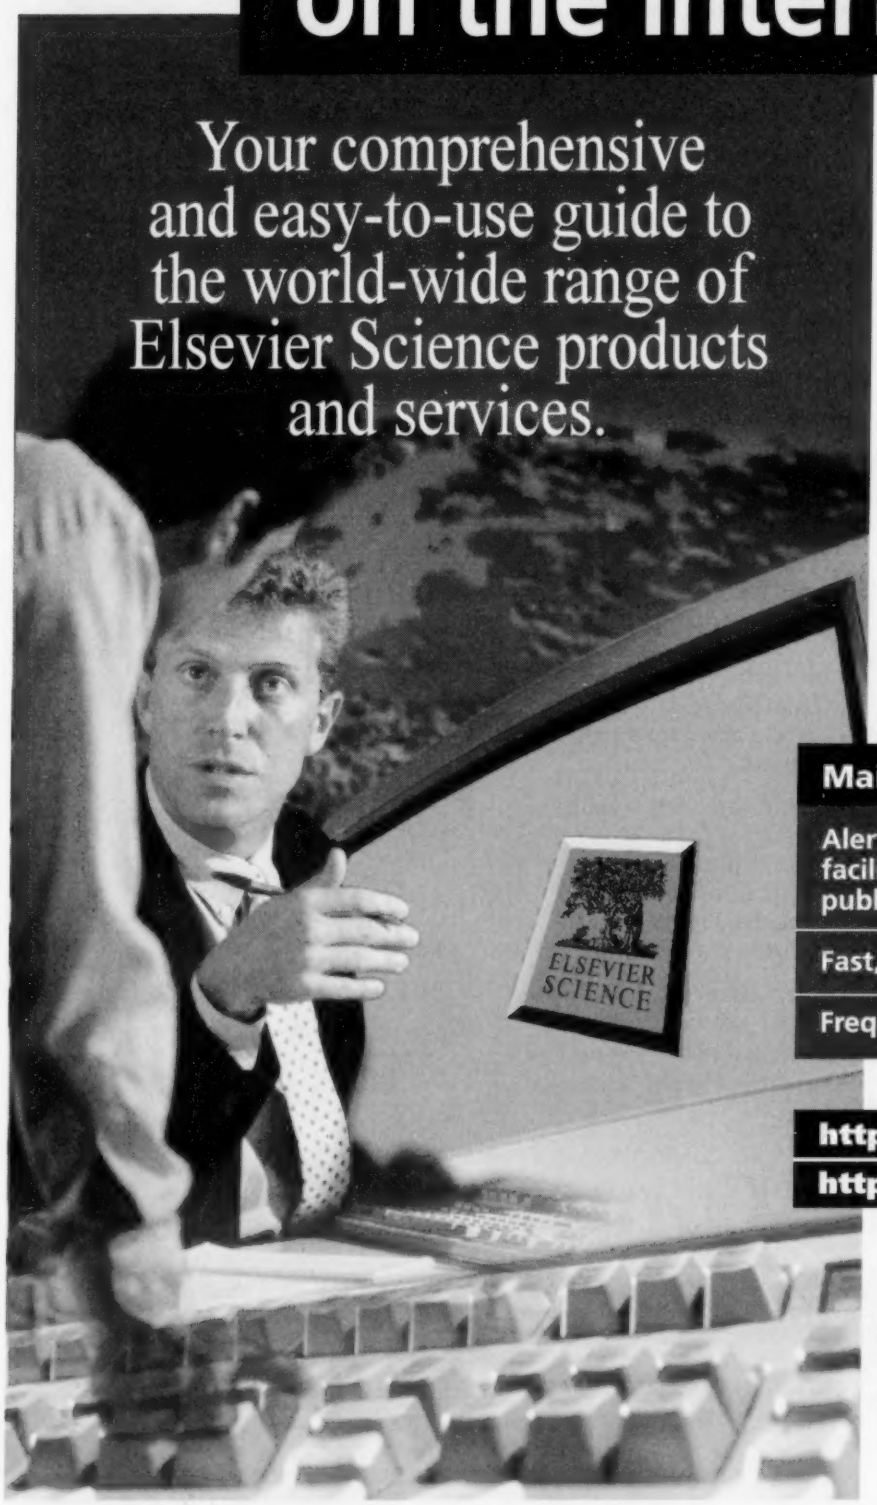
Elsevier Science on the Internet

Your comprehensive and easy-to-use guide to the world-wide range of Elsevier Science products and services.



Visit Elsevier Science on the Internet and access a unique repository of information covering the entire scientific spectrum. Our time-saving search facilities will lead you to our frequent updates in seconds.

Main features include:

- Alerting and awareness facilities for new and forthcoming publications.
- Fast, time-saving search facilities.
- Frequent updates.

What does ContentsDirect provide?

- Journal title
- Volume and issue number
- Title of paper
- Names of authors
- Page details
- Anticipated publication date
- News and offers

Why register to ContentsDirect?

- Provides via E-mail advance notice of forthcoming papers, allowing you to reserve the issue at your library.
- Provides an invaluable information resource to scientists and researchers requiring the very latest information on soon-to-be published papers.
- Keeps you at the forefront of current research.
- Enables you to create a personal archive of key journal contents in your field of interest.

How to register for ContentsDirect:

- The quickest way to register for **ContentsDirect** is via Elsevier Science home page on the world wide web.
- Registration is simple and the selection of titles is provided by access to drop down menus of all subject classifications with a complete listing of all titles available.
- If you wish to select new titles or amend your existing selection - simply re-visit the web site and personally make your changes.

NB If you can't access the web - please note that you can still register by sending an E-mail to **cdsubs@elsevier.co.uk**

ELSEVIER SCIENCE

Scope of the Journal

The aim of this journal is to bring together research papers in different areas of discrete mathematics. Contributions presented to the journal can be research papers, short notes, surveys, and possibly research problems. The 'Communications' section will be devoted to the fastest possible publication of the brief outlines of recent research results, the detailed presentation of which might be submitted for possible publication in DISC or elsewhere. The journal will also publish a limited number of book announcements, as well as proceedings of conferences. The journal will publish papers in combinatorial mathematics and related areas. In particular, graph and hypergraph theory, network theory, coding theory, block designs, lattice theory, the theory of partially ordered sets, combinatorial geometries, matroid theory, extremal set theory, logic and automata, matrices, polyhedra, discrete probability theory, etc. shall be among the fields covered by the journal.

Instructions to contributors

All contributions should be written in English or French, should have an abstract in English (as well as one in French if the paper is written in French), and—with the exception of Communications—should be sent in triplicate to Nelly Segal, Editorial Manager, RUTCOR, Rutgers, the State University of New Jersey, 640 Bartholomew Road, Piscataway, NJ 08854-8003, USA. The authors are requested to put their mailing address on the manuscript.

Upon acceptance of an article, the author(s) will be asked to transfer copyright of the article to the Publisher. This transfer will ensure the widest possible dissemination of information.

Manuscripts submitted for the Communications section, having at most 5 typewritten pages, should be sent to a member of the editorial board in triplicate. Detailed proofs do not have to be included, but results must be accompanied at least by rough outlines of their proofs. Subsequent publication in this journal or elsewhere of the full text of a research report, the outline of which has been published in the Communications section of our journal, is not excluded. Every effort shall be made for the fastest possible publication of Communications.

Please make sure that the paper is submitted in its final form. Corrections in the proofstage, other than of printer's errors, should be avoided; costs arising from such extra corrections will be charged to the authors.

The manuscript should be prepared for publication in accordance with instructions given in the 'Instructions to Authors' (available from the Publisher) details of which are condensed below:

- The manuscript must be typed on one side of the paper in double spacing with wide margins. A duplicate copy should be retained by the author.
- Special care should be given to the preparation of the drawings for figures and diagrams. Except for a reduction in size, they will appear in the final printing in exactly the same form as they were submitted by the author; normally they will not be redrawn by the printer. In order to make a photographic reproduction possible, all drawings should be on separate sheets, with wide margins, drawn large size, in Indian ink, and carefully lettered. Exceptions are diagrams only containing formulae and a small number of single straight lines (or arrows); these can be typeset by the printer.
- References should be listed alphabetically, in the same way as the following examples:
  For a book: W.K. Chen, Applied Graph Theory (North-Holland, Amsterdam, 1971).
  For a paper in a journal: P. Erdős, Some recent problems and results in graph theory, Discrete Math. 164 (1997) 81–85.
  For a paper in a contributed volume: M.O. Rabin, Weakly definable relations and special automata, in: Y. Bar-Hillel, ed., Mathematical Logic and Foundations of Set Theory (North-Holland, Amsterdam, 1970) 1–23.
  For an unpublished paper: R. Schrauwen, Series of singularities and their topology, Ph.D. Thesis, Utrecht University, Utrecht, 1991.
- LaTeX: If your manuscript has been prepared with (La)TeX, then your files may be of use to us for producing galley proofs and for printing. We only wish to receive the files once a paper has been accepted. Kindly send an MSDOS-formatted floppy disc with the final version. The contents of the files on the floppy should be exactly the same as the hard copy that we receive from you. If the file is suitable, proofs will be produced without rekeying the text. The article should be encoded in Elsevier-LaTeX, standard LaTeX, or AMS-LaTeX (in document style 'article'). *No changes from the accepted version are permissble, without the explicit approval by the Editor. The Publisher reserves the right to decide whether to use the author's file or not.* If the file is sent by e-mail, the name of the journal *Discrete Mathematics*, should be mentioned in the "subject field" of the message to identify the paper. Authors should include an ASCII table (available from the Publisher) in their files to enable the detection of transmission errors. The files should be mailed to: Michael D. Griffin, Elsevier Science B.V., P.O. Box 103, 1000 AC Amsterdam, Netherlands, Fax: (31-20) 4852616. E-mail: m.griffin@elsevier.nl.

The Elsevier LaTeX package (including detailed instructions for LaTeX preparation) can be obtained from the Comprehensive TeX Archive Network (CTAN). Search for Elsevier on the CTAN Search page (http://www.ucc.ie/cgi-bin/ctan), or the CTAN-Web page (http://tug2.cs.umb.edu/ctan/), or use direct access via FTP at ftp.dante.de (Germany), ftp.tex.ac.uk (UK), or tug2.cs.umb.edu (Massachusetts, USA) and go to the directory /tex-archive/macros/latex/contrib/supported/elsevier. The Elsevier package consists of the files: ascii.tab (ASCII table), elsart.cls (use this file if you are using LaTeX2e, the current version of LaTeX), elsart.sty and elsart12.sty (use these two files if you are using LaTeX2.09, the previous version of LaTeX), instraut.dvi and/or instraut.ps (instruction booklet), readme. CTAN is a mirrored network of ftp.tex.ac.uk, ftp.dante.de and tug2.cs.umb.edu, which are widely mirrored (see http://tug2.cs.umb.edu/ctan/ctansite.txt) and hold up-to-date copies of all the public-domain versions of TeX, LaTeX, Metafont and ancillary programs.

Author's benefits

1. 30% discount on all book publications of North-Holland.
2. 50 reprints are provided free of charge to the principal author of each paper published.

US mailing notice—Discrete Mathematics (0012-365X) is published (total 16 issues) by Elsevier Science (Molenwerf 1, Postbus 211, 1000 AE Amsterdam). Annual subscription price in the USA US$ 3450.00 (US$ price valid in North, Central and South America only), including air speed delivery. Application to mail at periodicals postage rate is pending at Jamaica, NY 11431.

USA POSTMASTERS: Send address changes to Discrete Mathematics, Publication Expediting, Inc., 200 Meacham Avenue, Elmont, NY 11003. Air freight and mailing in the USA by Publication Expediting.

This journal is part of **ContentsDirect**, the ***free*** alerting service which sends tables of contents by e-mail for Elsevier Science books and journals. The quickest way to register for **ContentsDirect** is via the World Wide Web at: **www.elsevier.nl/locate/ContentsDirect**
If you don't have access to the WWW you can register for this service by sending an e-mail message to cdsubs@elsevier.co.uk specifying the title of the publication you wish to register for. The tables of contents are also available on the Elsevier Science website at: www.elsevier. nl or www.elsevier.com or www.elsevier.co.jp
